

♂ Evolve Male FertilityReady™ Screen

#1 in Genetic Fertility Screening

The first and leading male genetic screen to assess reproductive health.

Male infertility contributes to a significant amount of infertility cases. Known genetic factors are responsible for 15-30% of male infertility.

Evolve Male FertilityReady™ Screen analyzes the most common genetic causes of infertility and factors that can impact reproductive success, either when attempting to conceive naturally or when undergoing assisted reproductive technologies (ART). Traditional physical and laboratory examinations for infertility cannot detect these genetic factors and often times misdiagnose or delay diagnosis of an underlying genetic abnormality. Genetic screening allows for a more personalized and refined diagnosis and the potential for tailored fertility treatments.

What's included on the Male FertilityReady™ Screen?

A superior genetic screen using **the latest Next Generation Sequencing (NGS)** technologies for sequencing + deletion/duplication analysis of **genes associated with fertility + MolecularKaryotype™**, plus Y chromosome microdeletion analysis.

We provide **High Accuracy & Detection Rates of >99% for most genes screened** to assess your reproductive risks at the genetic level.

Bringing a New Perspective to infertility care: Who should have the Evolve Male FertilityReady™ Screen?

Testing indications include:

- Personal or family history of infertility
- Recurrent pregnancy loss (RPL) with partner
- Hypogonadotropic hypogonadism (HH)
- Oligospermia (low sperm count)
- Azoospermia (absent sperm count)

Evolve Advantages: Male FertilityReady™ Screen

- ✓ **Rapid Turn-around Times & Reliable Results**, get your report sooner & have confidence in what your result means
- ✓ Utilizes **Blood or Saliva Testing Kits**, for screening that is convenient & fits into your life
- ✓ Available globally with access to **Complimentary Genetic Counseling** consultations both pre- & post- test
- ✓ EvolveGene® can help you make informed reproductive decisions
